It exists to fill a long overdue void in our understanding of our nation's rich maritime heritage. It means that there is a sustainable future for each site, through archaeology, research, study and dissemination. MAST also runs the Maritime Observatory in partnership with OceanMind: this approach to the detection of illegal activity at sea is a novel, holistic approach to the detection of illegal activity at sea. It combines both monitoring and detection of illegal fishing activities and the listing of known shipwreck sites. The Observatory uses a combination of satellite, artificial and human intelligence to study and detect such illegal activity. Developing patterns to promote the evolution of a predictive intelligence tool.	2021-07-06 14:26:35	MAST
